

Florida Society for Healthcare Risk Management & Patient Safety

The Florida Society for Healthcare Risk Management and Patient Safety is the only professional association which exclusively represents Florida Licensed Healthcare Risk Managers, Patient Safety Officers and other professionals who work in support of risk management and patient safety activities. Our growing membership represents and offers programming for those who work in various settings across the healthcare spectrum including hospitals, ambulatory outpatient settings, insurance and managed care organizations and continuing / long term care facilities.

The Florida Society for Healthcare Risk Management and Patient Safety provides several venues to connect our members with sponsors and vendors who wish to promote product and service offerings to potential clients or even to say “thank you” to current clients.

MEDIA KIT
